

A Manifesto for the Senator of Computer Science Post

Hello my fellow students,

My name is Muoneke Chukwuebuka, and I'm running for senator of computer science. I've been thinking a lot about what makes a good student leader, and for me, it's all about being the bridge between you and the department's executive council. I want to make sure your ideas and concerns don't just get heard, but actually get initiated. I'm all about working together and being upfront with everything we do to make our program even better. I've been a part of this department for some time now, and I've seen firsthand how it can be a powerful force for good, both academically and socially.

What I'm Promising to Do

If you elect me, I'll be focusing on a few key things to make a real impact, just as the constitution says a senator should;

1. Being Your Voice:

I'll be your direct line to the executive council. If you've got a suggestion for a new event? Have a problem that needs to be addressed? I'm here to listen and make sure your voice is amplified. To make this a reality, I plan to create an anonymous feedback form and hold regular open-door sessions so we can talk one-on-one. Your ideas are the foundation of our club, and I'll fight to ensure they are at the forefront of every decision.

2. Boosting Academic Support:

I'll work hand-in-hand with the VP of Academics to get tutorials running smoothly for us. We'll make sure the schedules work for everyone and that we have the resources we need to ace our classes. This means not just having tutorials for core subjects, but also exploring peer-to-peer sessions for more advanced topics like Data Structures, algorithms, and project development. My goal is to create a strong network of academic support that benefits every student, regardless of their current level.

3. Getting Involved:

The constitution requires senators to join a committee, and I'm excited about that. I plan to join the social committee. On the social committee, I'd work to plan more engaging events that foster a stronger sense of community. This involves coding competitions, sport competitions, movie/game nights, or even a nice end of semester celebration

4. Keeping You in the Loop:

I won't allow you to be left in the dark. I'll make sure you get all the important updates from the executive council—about meetings, events, and any big decisions—in a way that's easy to understand and quick to access. I'll use our department's WhatsApp groups and a dedicated

social media page to provide consistent, transparent, and timely information so you're always in the know.

5. Being Responsible:

I'll always be mindful of how we use the club's resources. I'll work with the Senate President and the executive council to ensure our budget is transparent and that every decision we make is for the benefit of all students. I'll be a diligent steward of club funds, making sure that every naira is spent wisely on programs and initiatives that directly serve our community.

Why You Should Vote for Me

I'm genuinely passionate about the BUCC community and ready to serve with a lot of energy and honesty. My main goal is to create a space where everyone feels like they belong and has what they need to thrive. I believe that by working together, we can build a stronger foundation for the computer science program and leave a lasting legacy for the students who come after us.

Vote Chukwuebuka for Senator. Together, we can make this happen!
